		Metal Posts	103	Finishing Touches	148 - 151		
				Ironmongery	152 - 153		

Things to Consider...

Driveways

Avoid puddles

Use Drainage Channels to drain water away and avoid water pooling on your new drive.

Make the right materials choice

Block paving is great for driveways but some of the other paving products in the brochure won't be suitable.

Get creative

Circles, octants, walling, edging and lighting can all add interest to your design.

Play with colour

Choose colours to complement or contrast with your home and its surroundings.

DriveFlair - page 19

Stonemaster - page 25

Woburn Original - page 23

Gardens

Texture and colour

Use texture and colour to bring added character and personality to your garden, pathway or driveway.

Catch the sun

Work out how the sun falls on your garden and when, and use it to best advantage when choosing features and plants.

Aggregates

Clever use of aggregates as mulches in borders can create added interest.

Formal or random?

Don't forget the size and laying patterns of the paving and decking you choose can dictate whether the final look is formal or random (for laying patterns see pages 162 - 163).

On the level

It's a lot easier to lay a patio on a level garden.

Steps and slopes

Capitalise on a sloping garden as an opportunity to create interesting steps, features and decked terraces.

Mix it up

Circles, octants, walling, edging, water features, stepping stones, paths, lighting - there's a whole variety of ways to create a great garden.

Outside room

Add arches, arbours, gazebos or even a cabin to utilise your outdoor space.

Contemporary Round Spindle System - page 114

Panache Textured, Cream, Chocolate and Fudge - page 47

What sort of garden suits your lifestyle?

It's important to decide what you want from your garden at the beginning. Are you looking to create a space where you can relax with friends, hold barbecues and let parties spill out from the house into the garden? Or is a haven of tranquility more your style? Somewhere you can escape the pressures of the day. Whatever suits your lifestyle, Travis Perkins has the materials and expertise to help you create your perfect landscape.

Somewhere to socialise

A more practical space where you can relax with friends and family.

Your personal haven

A place where you can find peace and quiet, far away from a mad world.

Rustic charm

Even in the heart of the city you can bring a little of the countryside into your garden.

Designer chic

A sleek, modern garden that makes a statement.

A heritage garden

Drawing on Britain's rich garden heritage.

A taste of the exotic

Recreate some of the garden styles of other cultures you've encountered on your travels.

Green fingers

Somewhere that's designed to accommodate your love of gardening.

Wildlife reserve

A space that's welcoming to insects, birds, animals and all of Mother Nature.

Finesse - page 48

Product Installation

Finding a good installer is essential as you will rely on their advice, product knowledge and workmanship to achieve the first class garden or driveway you desire.

Create an outdoor space that suits your lifestyle and be inspired with Bradstone's garden landscaping collection.

Here are a few handy hints to consider when planning your project:

- 1. Timing** - plan and prepare to give your installer plenty of notice.
- 2. Compare quotes** - obtain detailed, written quotes for accurate comparison.
- 3. Communication** - ensure your installer understands your needs to ensure you get the best results.
- 4. Confirmation** - always obtain written confirmation once you have accepted a quote, with terms and conditions. This will ensure there are no misunderstandings at a later stage.

- 5. Product** - select the right product for your project. Bradstone have divided their products into categories to help with your decision. If possible, it's worth visiting your local Travis Perkins branch to view the products before you make a final decision.
- 6. Size** - consider the size of your garden or driveway and explore complimentary products to make the most of your space.
- 7. Driveways** - if planning a driveway, it's worth checking that your plans comply with driveway legislation.

Cost of installation

The question most frequently asked is "how much will it cost?" The majority of installation costs are usually ground preparation and labour. **Opting for the best quality paving won't significantly increase the overall cost, so choose the best you can afford.**

Product Bands

The Driveways and Paving product bands are designed to give you an overview as to where the different product ranges sit within their specific category.

The products in Pricing Band 1 represent the standard product range. As you move up the bands, the products increase in value as they have greater features and include a more premium finish. Look out for the Pricing Bands as you go through the brochure but please remember, these Product Bands are intended as a guide only. For a full quotation, it is recommended that you speak with your local Travis Perkins branch or Tradesman.
