# Sustainable Driveway Solutions for Front Gardens

Everyday decisions such as creating vehicle parking areas on our properties can have environmental consequences. In times of heavy or sustained rainfall the drainage system can become overloaded and cause catastrophic flooding.

Because of this and changes to Government legislation, it is becoming increasingly important to focus on well balanced, sustainable driveway design.

Achieving a well balanced driveway design within the guidelines of the legislation need not be complicated.

You simply need to decide how you would like to manage the rainwater that lands on your driveway. Choose your preferred Bradstone product and a reputable installer for the perfect driveway solution.

Here are three options you might choose to manage the rainwater that lands on your driveway, along with some product ideas for each option.

## Option One

**Direct rainwater to a flower bed or another area of the garden which has been designed to allow water to drain away. NO PLANNING PERMISSION REQUIRED.**

This option may involve using linear drainage or a driveway channel. It may also involve your installer putting a soakaway underneath part of your lawn.

Drainage Channel

Linear Drainage

### Driveway product suggestions

Woburn Original

Woburn Rumbled

Woburn Cobble

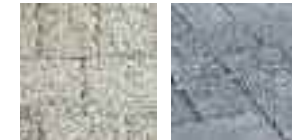

Driveway, Buff

## Option Two

**Use permeable paving which allows rainwater to drain through your driveway into the ground below. NO PLANNING PERMISSION REQUIRED.**

Your installer will prepare the driveway sub-base, which allows water to travel down between the blocks into the ground.

### Driveway product suggestions

Woburn Rumbled Infilta

Driveway Infilta

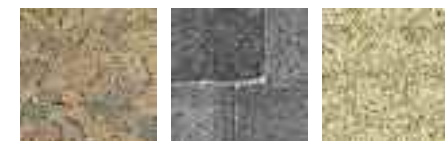

Driveway Infilta

## Option Three

**Do not make any provision for the rainwater that falls on your driveway. PLANNING PERMISSION IS REQUIRED.**

This is the least sustainable option and may contribute towards a build up of rainwater on your property during times of heavy rain. However, if you choose to go down this route and your Local Authority grants you Planning Permission you can use any Bradstone impermeable concrete block paving.

# Permeable Paving

## Bradstone Driveway Infilta

**2** For more information on Product Bands see page 11.

Unlike conventional block paving, Bradstone Driveway Infilta is a permeable product that offers a solution to the Government legislation for front of homes (detailed on page 14). It allows rainwater to filter through gaps between the blocks into a stone sub-base below. This water then either soaks into the ground, is discharged into a surface water drainage system, or is collected for re-use.

Bradstone Driveway Infilta	Colour	Product Code	Pack Size	No. Per m <sup>2</sup>	No. m <sup>2</sup> Per Pack

## Bradstone Woburn Rumbled Infilta

**3** For more information on Product Bands see page 11.

A distinctive cobble-type paving that has a rumbled finish to give a traditional look to your drive, whilst also having the added benefit of being a permeable solution. Permeable paving allows rainwater to filter through gaps between the blocks, into a stone sub-base below. This solution complies with the Government regulations for front of homes. For more information, see page 14.

## Bradstone Woburn Cobble

**1** For more information on Product Bands see page 11.

Similar in appearance to rumbled paving, Bradstone Woburn Cobble has the weathered worn profile but a more economical price. Treated with the Bradstone Surface Protection sealant for easy clean, protecting against everyday contaminants such as oil, grease and moss. The protection will last 4-6 years in trafficked areas.

The paving is available in four colours; Grey-Green, Autumn, Antique Chestnut and Weathered Limestone.

Bradstone Woburn Cobble	Colour	Product Code	Pack Size	No. Per m <sup>2</sup>	No. m <sup>2</sup> Per Pack
Mixed pack - 3 Sizes	Grey-Green	765922	450	-	9.28
Mixed pack - 3 Sizes	Autumn	765926	450	-	9.28
Mixed pack - 3 Sizes	Antique Chestnut	765924	450	-	9.28
Mixed pack - 3 Sizes	Weathered Limestone	765923	450	-	9.28

Each pack contains: 90 of 100 x 134 x 50mm, 180 of 134 x 134 x 50mm and 180 of 200 x 134 x 50mm

For more information on Bradstone Surface Protection, see page 165.

Grey Green Autumn Antique Chestnut Weathered Limestone

## Bradstone Stonemaster

**3** For more information on Product Bands see page 11.

This sawn sandstone simulate offers a more economical alternative natural stone block paving.

Bradstone Stonemaster is sealed with Bradstone Surface Protection for easy clean, protecting against everyday contaminants such as oil, grease and moss. Available in 6 shades of Buff with the option to mix packs for shade variation.

Bradstone Stonemaster - Mixed Pack	Colour	Product Code	Pack Size	No. Per m <sup>2</sup>	No. m <sup>2</sup> Per Pack

# Kerbs

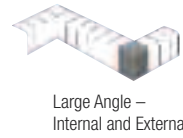

Bradstone Block Kerbs provide practical barriers to vehicle overrun, and are particularly recommended where driveways are laid immediately adjacent to lawned areas. They are designed to complement the block paving ranges featured in this brochure and are available in a choice of three colours: red, charcoal and brindle. Each style of kerb can be used in a variety of different ways to create alternative profiles.

Clay Pavers, Bremen Brown

# Clay Block Paving

## Clay Pavers

### Bring home the beauty of natural clay paving

Beautiful durable and practical, no other hard landscaping material offers the outstanding benefits of natural clay paving.

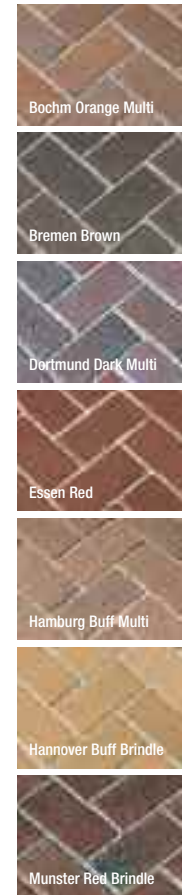

### Quality you can trust

Manufactured to the most exacting standards from natural raw materials, clay pavers are incredibly weather, frost and fire-resistant, with colour and character that can last for many years. Unlike some alternative materials they do not fade over time, giving an unrivalled combination of lasting good looks and long term performance wherever they are laid.

### Colours and textures

The exquisite choice of colours available provides endless opportunities for self-expression, whether your taste is classical or contemporary, you can create a garden that suits your personality and lifestyle – right down to the ground.

Clay paving should be laid in line with a 3-5mm joint with allowance for natural size variations of fired clay.
