Clay Block Paving	44 - 45						

Things to Consider...

Driveways

Avoid puddles

Use Driveline and Drivesett® Channel to drain water away and avoid water pooling on your new drive.

Make the right materials choice

Block paving is great for driveways but some of the other paving products in the brochure won't be suitable.

Get creative

Circles, octants, walling, edging and lighting can all add interest to your design.

Play with colour

Choose colours to complement or contrast with your home and its surroundings.

Drivesett® Tegula® Traditional with Jumper Blocks - page 22

Drivesett® Argent® - page 27

Drivesett® Duo Circle - page 26

Gardens

Texture and colour

Use texture and colour to bring added character and personality to your garden, pathway or driveway.

Catch the sun

Work out how the sun falls on your garden and when, and use it to best advantage when choosing features and plants.

Aggregates

Clever use of aggregates as mulches in borders can create added interest.

Formal or random?

Don't forget the size and laying patterns of the paving and decking you choose can dictate whether the final look is formal or random (for laying patterns see pages 182 - 183).

On the level

It's a lot easier to lay a patio on a level garden.

Steps and slopes

Capitalise on a sloping garden as an opportunity to create interesting steps, features and decked terraces.

Mix it up

Circles, octants, walling, edging, water features, stepping stones, paths, lighting - there's a whole variety of ways to create a great garden.

Outside room

Add arches, arbours, gazebos or even a cabin to utilise your outdoor space.

Contemporary Round Spindle System - page 134

Fairstone® Riven, Silver Birch Multi - page 50

What sort of garden suits your lifestyle?

It's important to decide what you want from your garden at the beginning. Are you looking to create a space where you can relax with friends, hold barbecues and let parties spill out from the house into the garden? Or is a haven of tranquility more your style? Somewhere you can escape the pressures of the day. Whatever suits your lifestyle, Travis Perkins has the materials and expertise to help you create your perfect landscape.

Somewhere to socialise

A more practical space where you can relax with friends and family.

Your personal haven

A place where you can find peace and quiet, far away from a mad world.

Rustic charm

Even in the heart of the city you can bring a little of the countryside into your garden.

Eclipse® Granite - page 67

Woodstone® Sleepers - page 100

Firedstone® - page 63

Fairstone® Sawn, Golden Sand Multi - page 54 - 55

Argent® Walling - page 93

Heritage® Octant - page 80 - 81

Reclaimed Railway Sleepers - page 100

Sleepers - page 100 - 101

Fairstone® Riven - page 50 - 51

Chancery® Paving - page 68 - 69

Designer chic

A sleek, modern garden that makes a statement.

A heritage garden

Drawing on Britain's rich garden heritage.

A taste of the exotic

Recreate some of the garden styles of other cultures you've encountered on your travels.

Green fingers

Somewhere that's designed to accommodate your love of gardening.

Wildlife reserve

A space that's welcoming to insects, birds, animals and all of Mother Nature.

*The only quantity calculator
you'll ever need!*

Planning a Patio or Driveway project?

If you need inspiration or practical help in creating and calculating your new driveway or patio, then speak to your local Travis Perkins.

Our branches have access to Marshalls' Paving Planner software, which not only provides laying patterns to inspire your plan, but also calculates the amount of product you will need.

The quick and simple Project Quantity calculator features all Marshalls' paving and block paving products, and also now includes a new border detail feature for even more inspired designs.

So rather than spend time on awkward laying patterns or calculating quantities, contact your local Travis Perkins branch and let them work it out for you.

Plot → Select → Calculate and Print

The Marshalls Paving Planner service lets you quickly plan and calculate the product quantities you'll need for your patio or driveway project.

Benefits of the Paving Planner service:

- Accurate quantities
- Huge choice of laying patterns
- Select by flag size
- Add kerb and edging
- Colour swatches
- Calculates carbon value
- Easy printout

Product Installation

Finding a good installer is essential as you will rely on their advice, product knowledge and workmanship to achieve the first class garden or driveway you desire.

Here are a few simple rules to follow to ensure your project will be trouble free.

- 1 Plan early - reputable installers are in demand and will need plenty of notice. Be wary of installers who can start tomorrow.
- 2 Always get more than one quotation - never accept a verbal estimate and obtain at least three written quotes. Make sure all quotes are on a like-for-like basis for a correct comparison.
- 3 Don't decide purely on price - choose the contractor that you feel best suits your needs, it may be the difference between a good job and an outstanding one.
- 4 When you accept a quote always request written confirmation detailing what the contractor has agreed to carry out for the price. It avoids misunderstandings.
- 5 Select the best product for the job. Always use block paving on driveways, though the best garden schemes will use a wide range of complementary products. See 'Things to Consider' pages 4 - 5 for advice.
- 6 Never overlook drainage - ensure your installer is able to assess the natural condition of the landscape and can propose appropriate drainage that will be compliant with current regulations.
- 7 Protect your investment - whilst your written contract protects your interest during construction, on completion you should consider Marshalls own Hard Landscape Guarantee for 10 years.

Cost of installation

The question most frequently asked is "how much will it cost?" The majority of installation costs are usually ground preparation and labour. **Opting for the best quality paving won't significantly increase the overall cost, so choose the best you can afford.**

Product Bands

The Driveways and Paving product bands are designed to give you an overview as to where the different product ranges sit within their specific category.

The products in Pricing Band 1 represent the standard product range. As you move up the bands, the products increase in value as they have greater features and include a more premium finish. Look out for the Pricing Bands as you go through the brochure but please remember, these Product Bands are intended as a guide only. For a full quotation, it is recommended that you speak with your local Travis Perkins branch or Tradesman.
